# INTRODUCTION

**Devhost**, the annual flagship event organized by the Sahyadri Open Source Community, is set to be an exhilarating convergence of innovation and expertise. Hosted at the Sahyadri College of Engineering and Management, Adyar, Mangalore, this 8th edition promises an extensive lineup of activities designed to upskill and inspire.

Attendees will have the opportunity to engage in dev talks, hands-on workshops, and masterclasses spanning domains like Web3 and APIs, led by top industry experts. Panel discussions featuring notable speakers from Mangalore will explore the burgeoning opportunities in the city, while experts will discuss the latest trends in technology and strategies for staying relevant in a rapidly evolving field.

A highlight of DEVHOST is the **36+hour hackathon**, where participants will tackle real-world industry problem statements, compete for the top spot through innovative solutions. This event offers an unparalleled chance to network with **over 50+ industry experts**, learn about current IT industry trends, and understand how Mangalore is emerging as a significant IT hub.

# ABOUT SOSC

The **Sahyadri Open Source Community (SOSC)** is a student-led group passionate about **technology** and **open source**. It helps students enter the open-source world through **workshops**, **hands-on training**, and engaging events. By collaborating with initiatives like **GitHub Campus Expert** and **GDSC**, **SOSC** fosters a supportive environment for learning, contribution, and community-driven skill development.

With **100+ active members**, **SOSC** thrives with opportunities to **explore tech**, **connect**, **innovate** and **engage** in **open source contributions**. We welcome individuals from **all backgrounds** to learn, share, and grow—whether in coding, design, or other fields. At **SOSC**, **collaboration fuels creativity**, and **teamwork drives growth**. Everyone is encouraged to contribute, support one another, and **build together**.

We achieve this by arranging our own popular workshops, such as **Git & GitHub** sessions, and by participating in global open-source fests like **Hacktober**. Notable initiatives include **Codeblaze 2023**, a 20-hour hackathon with 400+ participants. Other highlights include **TechWeek**, **HackHarbor 3.0**, a peer-to-peer learning initiative, and **DevHost 2024**, our flagship three-day tech festival. Everyone interested in technology is welcome at SOSC!

# OUR PAST DEVHOST

DevHost 2024 was a vibrant celebration of technology, bringing together over 2,000 passionate students from more than 25+ colleges. The event successfully bridged the gap between academia and industry through a series of insightful keynotes and DevTalks from leaders like Bheema Prakash, Head of Service Delivery at Ericsson India, and hands-on masterclasses led by experts such as Pranav Durai, Research Scholar at Stanford School of Medicine and more.

The flagship event, HackNight, was a 20-hour hackathon fueling innovation and intense problem-solving. Aspiring entrepreneurs showcased their ideas at TechPitchX, while esports tournaments and the inter-college DK24 Summit brought together tech communities from across Silicon Beach, adding to the event's high-energy atmosphere.

# THIS YEAR AT DEVHOST

Looking ahead to our **DevHost - Expertise Redefined, Experience Reimagined**, In November 2025, the event promises to build on the successes of our past DevHost by offering more diverse sessions, larger hackathon challenges, and increased industry partnerships. Plans are underway to include cutting-edge topics and attract a broader national audience, further solidifying Sahyadri College of Engineering and Management's reputation as **a hub for innovation and learning**.
